Responsibilities

The company of today is powered by its IT systems and infrastructure. This role as a Systems Administrator for FlexGen's IT and Cybersecurity team will be responsible for administering key components of FlexGen's technical infrastructure.

The Systems Administrator will manage a wealth of cloud-based services, servers, and accounts. Keeping our IT infrastructure running effectively, securely, and up to date is critical for the day-to-day tasks of every employee. The Systems Administrator will also be responsible for the troubleshooting of technical issues as they occur in order to allow for the smooth execution of FlexGen's mission.

If you are someone that thrives in an entrepreneurial environment, and is an innovative, independent critical thinker, with quick follow-on execution, then FlexGen's culture will fit you well. This role reports to the Manager of IT and Cybersecurity.

At FlexGen "We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity or expression, pregnancy, age, national origin, disability status, genetic information, protected veteran status, or any other characteristic protected by law."
